I am a recent studied and have learned MERN full stack development, which includes MongoDB, Express.js, React.js, and Node.js.

Skills: HTML5, CSS3, JavaScript and Reactjs are languages that I have a lot of knowledge in. I can also manage databases using MongoDB. I have experience using React.js in my frontend development work, and it has proven to be one of the most userfriendly frameworks at the present time. I am familiar with Node.js for backend development.

In the career highlights, you can find:
As part of my education, I worked on a few projects and demonstrated my skills in MERN stack development. I actively participated in teamwork and made significant contributions to the accomplishment of shared assignments
